Please translate into Spanish

This is an emergency message from La Plata County Office of Emergency Management, EPA, and San Juan Basin Health. This is regarding the domestic water from private wells immediately next to the Animas River. Due to the Gold King Mine Incident, authorities are conducting sampling of household water from water wells in your area that are immediately next to the Animas River and may be influenced by river water. If you have a well, used for household water and would like a sample collected, please call the La Plata County Call Center at (970) 385-8700. If your water is supplied from a public water system, for example Animas Water Company or the City of Durango, your water is already being sampled and you do not need to call. Once

again the number to call is (970) 385-8700.

**Claire Macpherson**

Regional Emergency Preparedness and Response Coordinator

San Juan Basin Health Department

(970) 335-2038 – office

(970) 749-5042 – mobile
